DISCHARGE SUMMARY

Last Name	Room No.	Hosp. No.
Berstin, Debra	23B	2067

Attending Physician	Date of Admission	Date of Discharge
Anen	4/11/75	4-14-75

Provisional Diagnosis: Full term pregnancy. Labor to be induced.

Final Diagnosis: The same, with deliverable of a healthy female infant.

Operation: Delivery of full term intrauterine pregnancy.

Brief History and Essential Physical Findings: The pt. is a 24 year old white female who has been followed in the office for a normal intrauterine pregnancy. Labor was induced at 10:00 a.m. on the morning of 4-11-75, and pt. progressed steadily for about 4½ hours. At 8:30 P.M., she began labor again on her own, and baby was delivered at 1:10 A.M. Baby was delivered over a 2° episiotomy, with minimal bleeding, and Apgar was judged to be 8-9.

Significant Laboratory, X-ray and Consultation Findings:

Lab work was within normal limits, except for a slight white count elevation in the U.A. CBC was normal.

Course in Hospital with Complications, if any:

The pt. tolerated hospitalization well, and on 4-13-75, she was ambulating, was afebrile, and was tolerating diet. The pt. had only minimal vaginal bleeding.

Condition, Treatment, Final Disposition on Discharge and Prognosis:

The pt. is discharged to home with her baby. Prognosis is good and condition is satisfactory. She is instructed to return to the clinic, for re-evaluation in 6 weeks.
